

# International cooperation to provide geodetic reference frame data and products: Global space-geodetic data analysis and data repositories at BKG

Daniela Thaller

*and colleagues of Section G1 at BKG:*

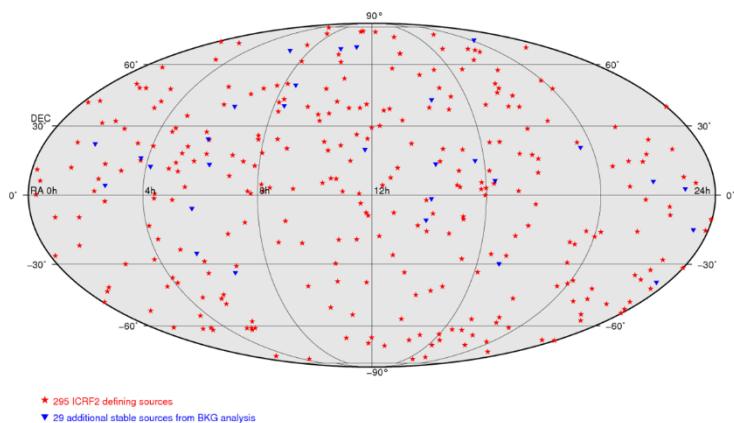

S. Bachmann, W. Dick, G. Engelhardt, C. Flohrer, S. Geist,  
A. Girdiuk, D. König, S. Schneider-Leck, D. Ullrich, R. Wojdziak

# Overview

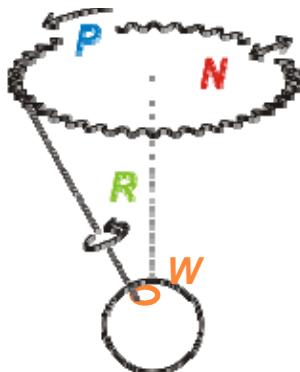

- Generation of space-geodetic reference frame products by the services of IAG (International Association of Geodesy)
- Contributions of BKG:
  - SLR Analysis Center
  - VLBI Analysis Center
  - VLBI Combination Center
  - IVS Data Center
  - IERS Central Bureau

# Products of the geodetic reference frame

## Celestial Reference Frame

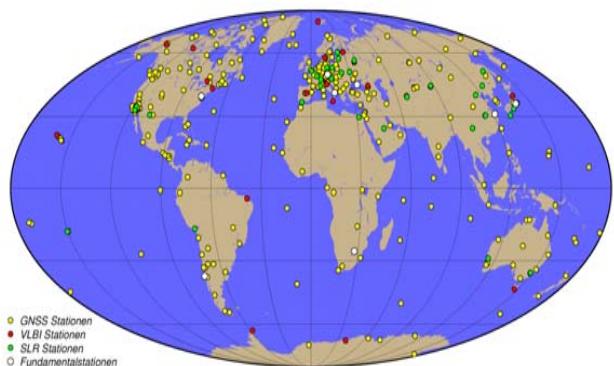

## Earth Orientation Parameters

EOP

## Terrestrial Reference Frame

Bundesamt für  
Kartographie und Geodäsie

# Operational product generation by IAG services

Coordination of observing program, data analysis, centralized provision of all data and products.

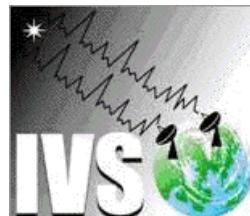

**IDS:** International DORIS Service

**IGS:** International GNSS Service

**ILRS:** International Laser Ranging Service

**IVS:** International VLBI Service for Geodesy  
and Astrometry

# Operational product generation by IAG services

Coordination of observing program, data analysis, centralized provision of all data and products.

**IDS:** International DORIS Service

**IGS:** International GNSS Service

**ILRS:** International Laser Ranging Service

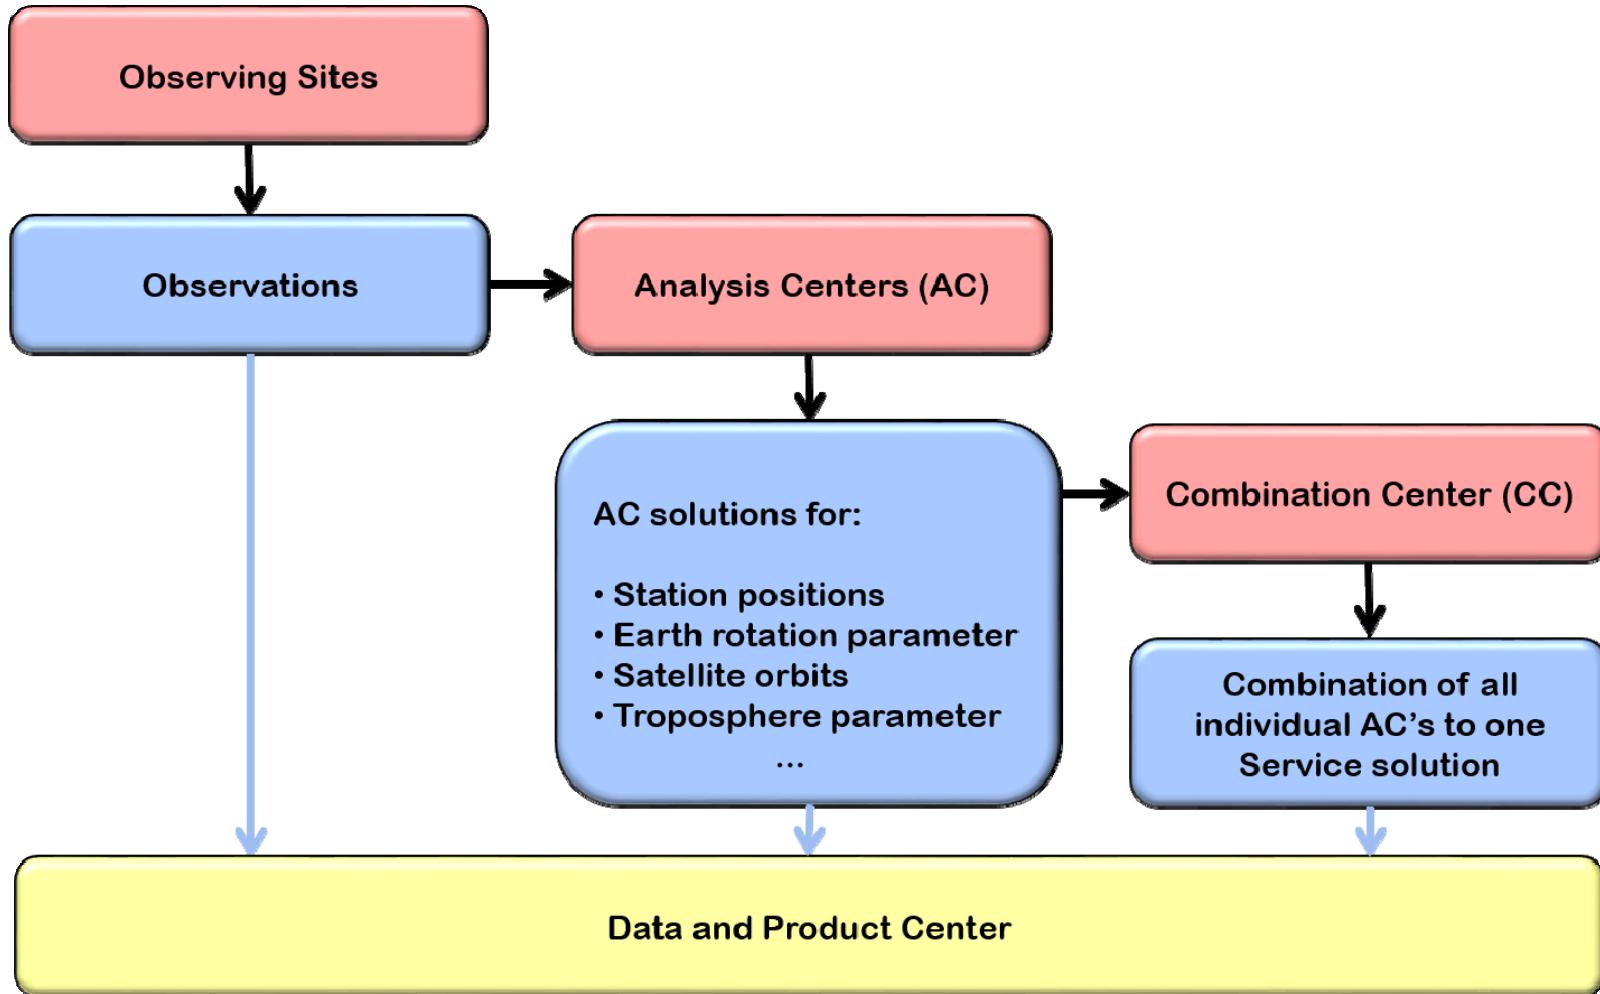

**IVS:** International VLBI Service for Geodesy  
and Astrometry

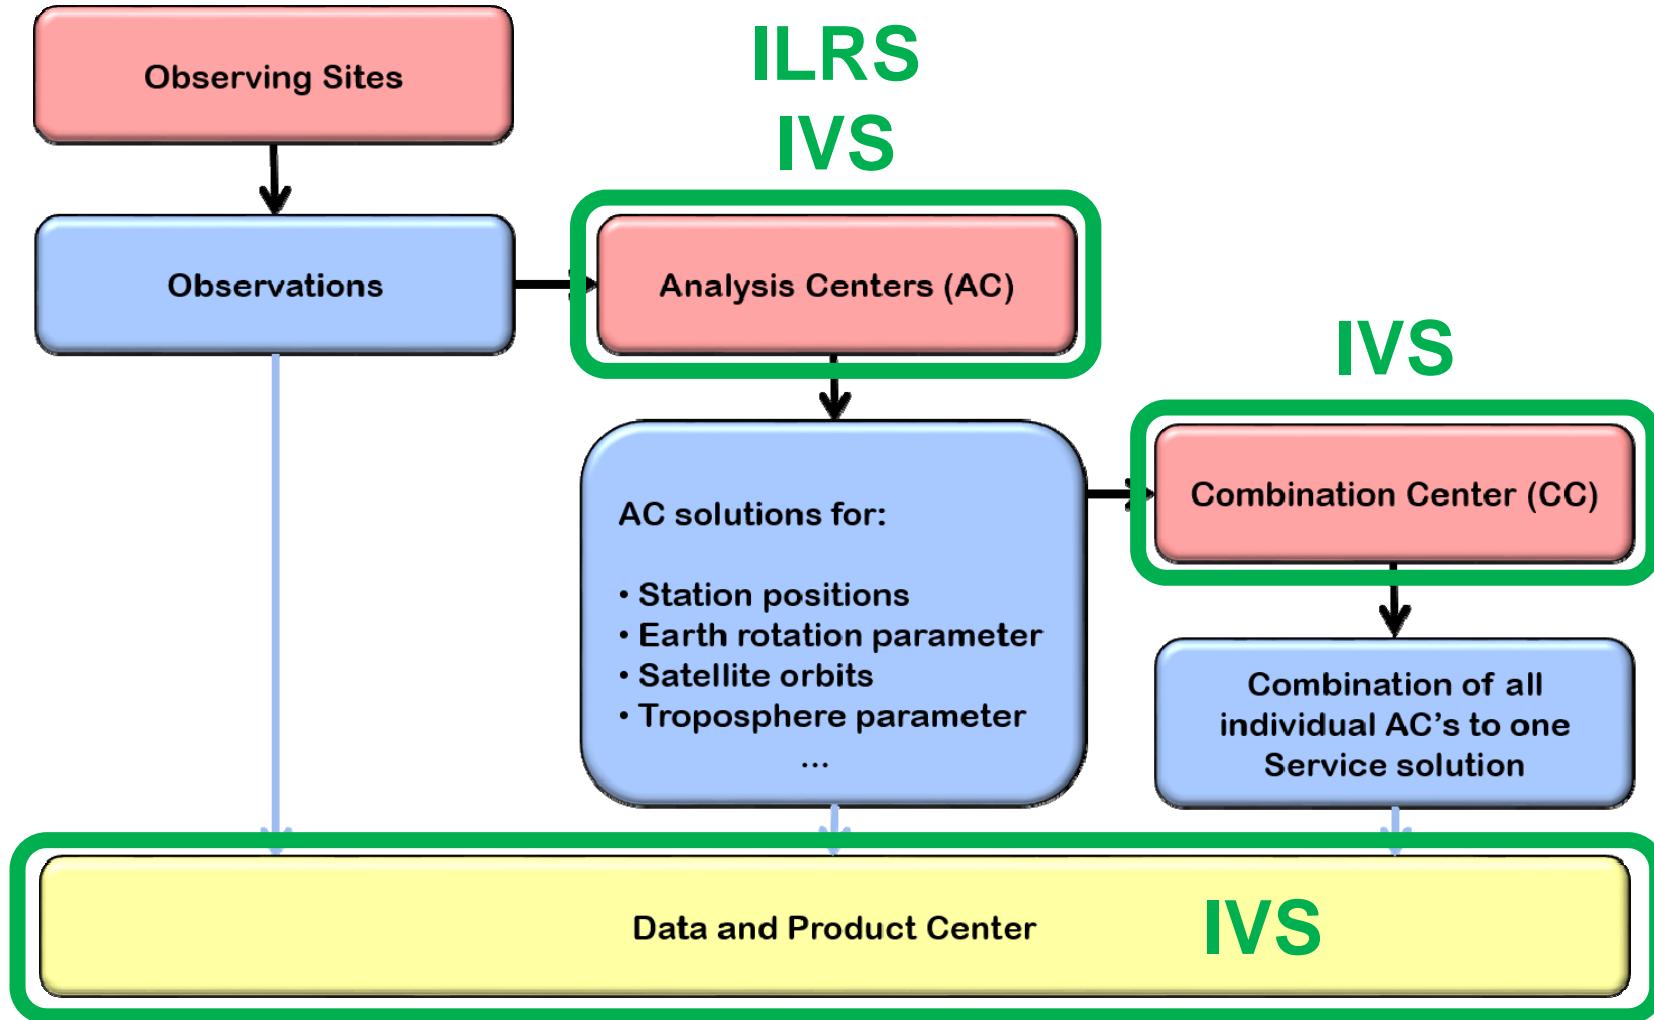

Bundesamt für  
Kartographie und Geodäsie

# Operational product generation by IAG services

# Operational product generation by IAG services

# SLR data analysis at BKG

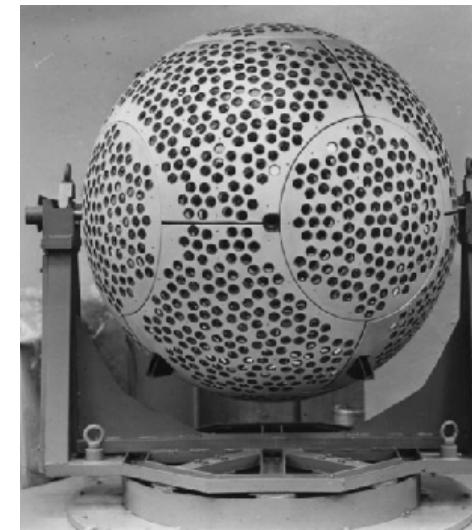

- BKG is full ILRS Analysis Center
- Using **Bernese GNSS Software 5.3** (SLR development version) since July 2010
- 2 operational products are generated (7-day solutions):
  - **DAILY:**
    - Generated every day
    - Latency ~ 18 hours
  - **WEEKLY:**
    - Generated once per week (Tuesday)
    - Covering Sunday – Saturday of previous week
    - Latency ~ 4-11 days

# SLR data analysis at BKG

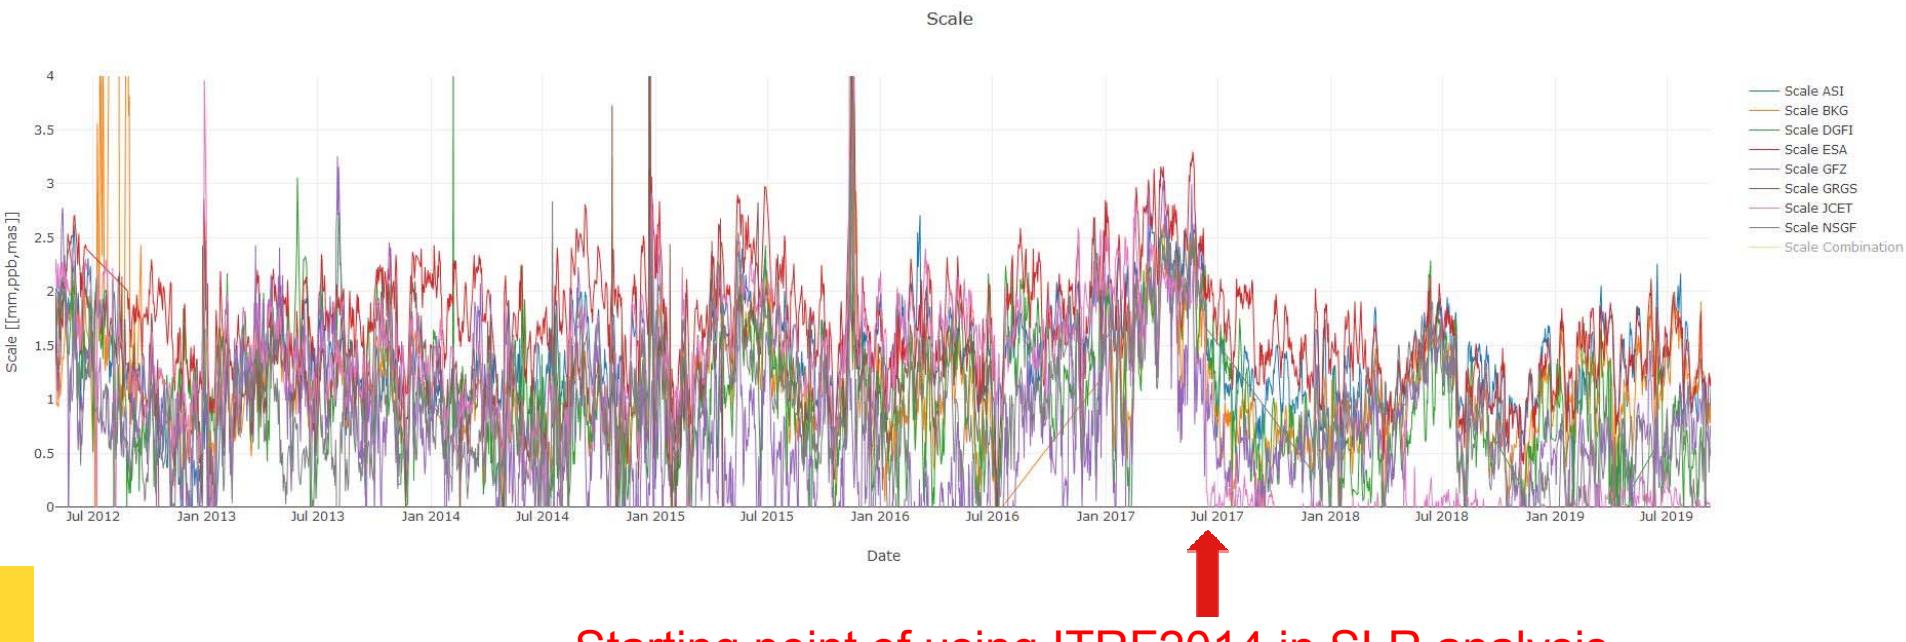

- Satellites used for operational products:
  - LAGEOS, LAGEOS-2:
    - Orbital height  $\approx 5.800$  km
  - ETALON-1/-2:
    - Orbital height  $\approx 19.000$  km
- Parameter estimation in one common estimation step:
  - Satellite orbits
  - Station coordinates
  - Earth rotation parameters: x-/y-pole, LOD
  - Range biases for selected stations

# SLR data analysis: DAILY solution series

**Scale** w.r.t. actually used ITRF (using „Core Sites“):

0.3 – 2.0 ppb

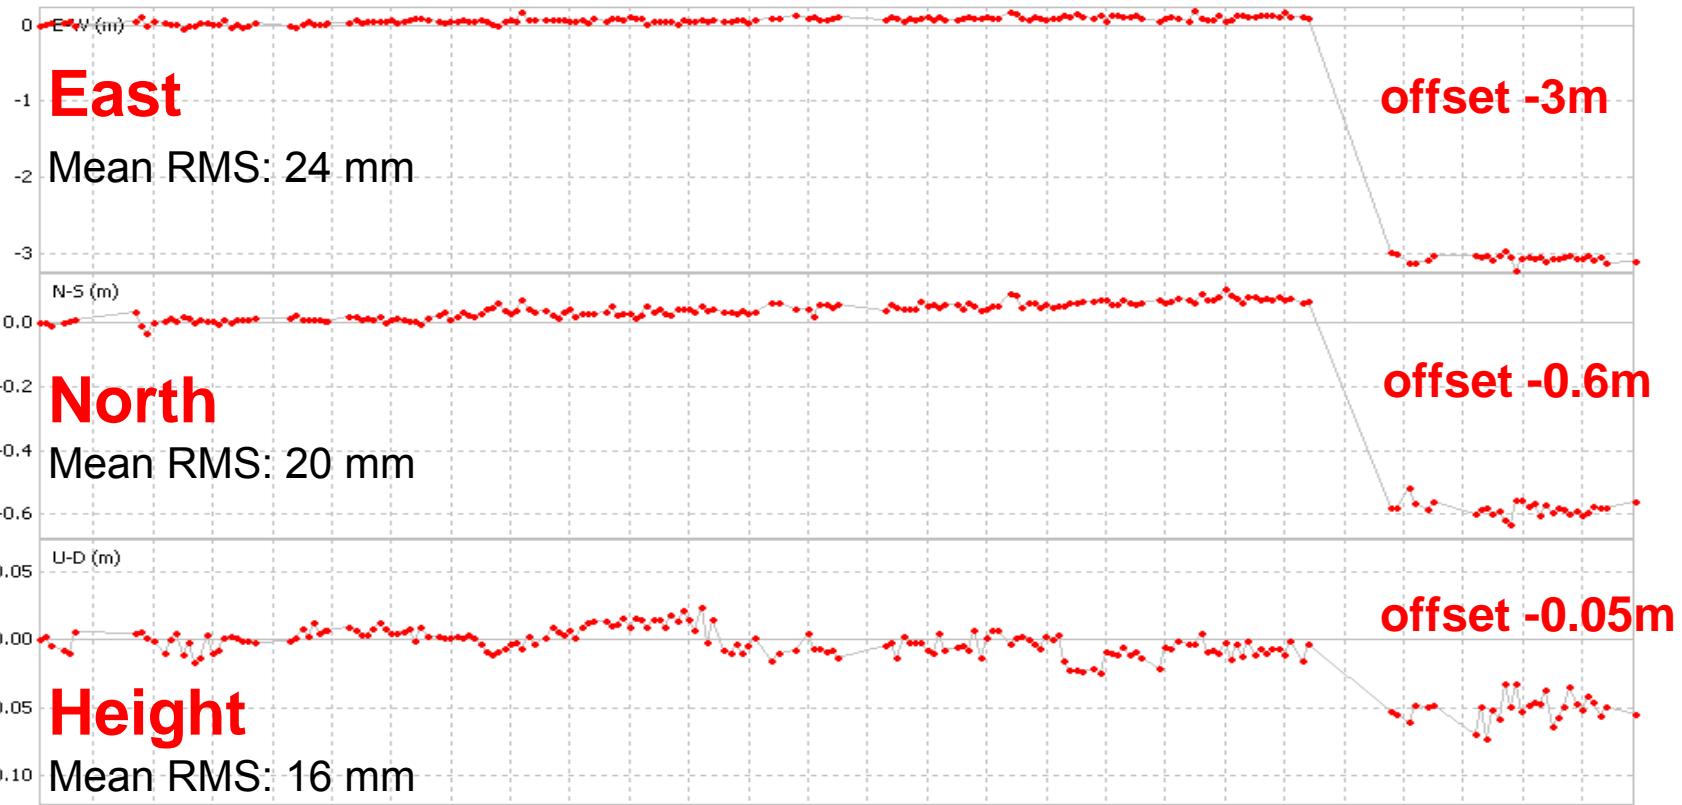

# SLR data analysis: DAILY solution series

## Length of Day (LOD) w.r.t. IERS Bulletin A

# SLR data analysis: Re-processed long time-series of station coordinates

Earthquake at Concepcion 27.02.2010: TIGO station positions

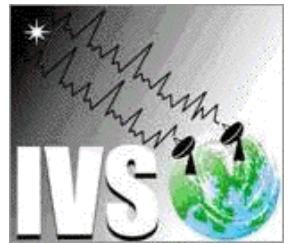

# VLBI data analysis at BKG

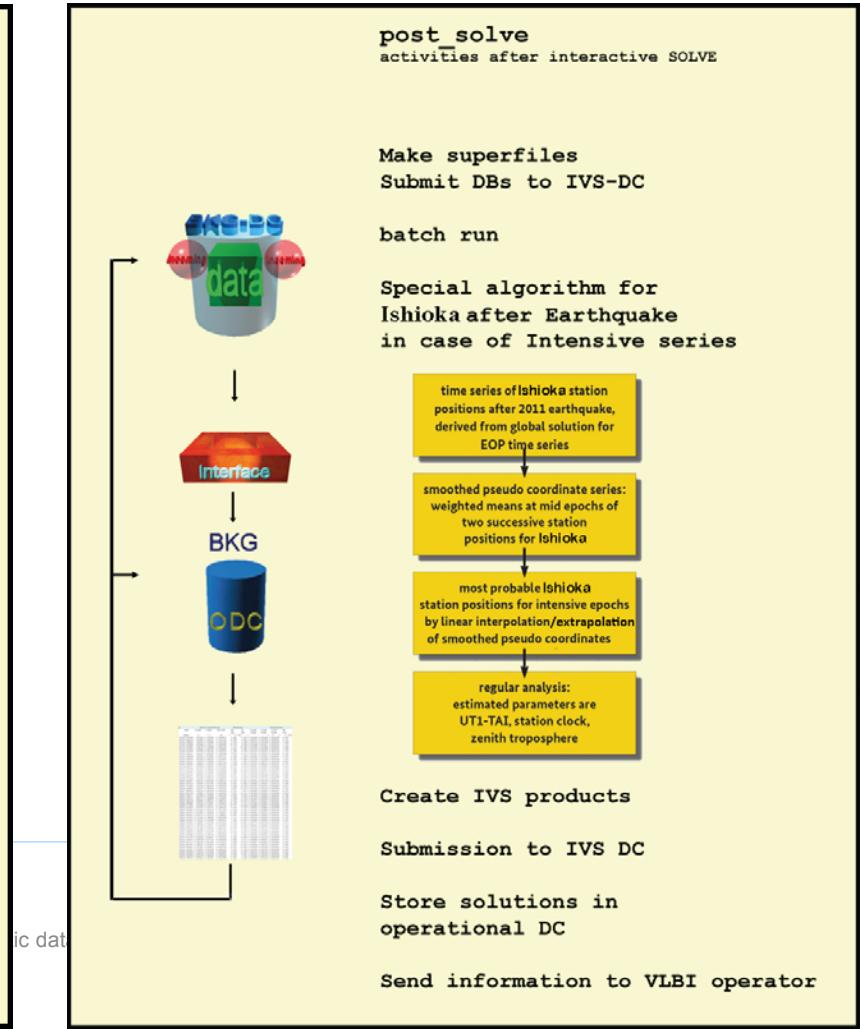

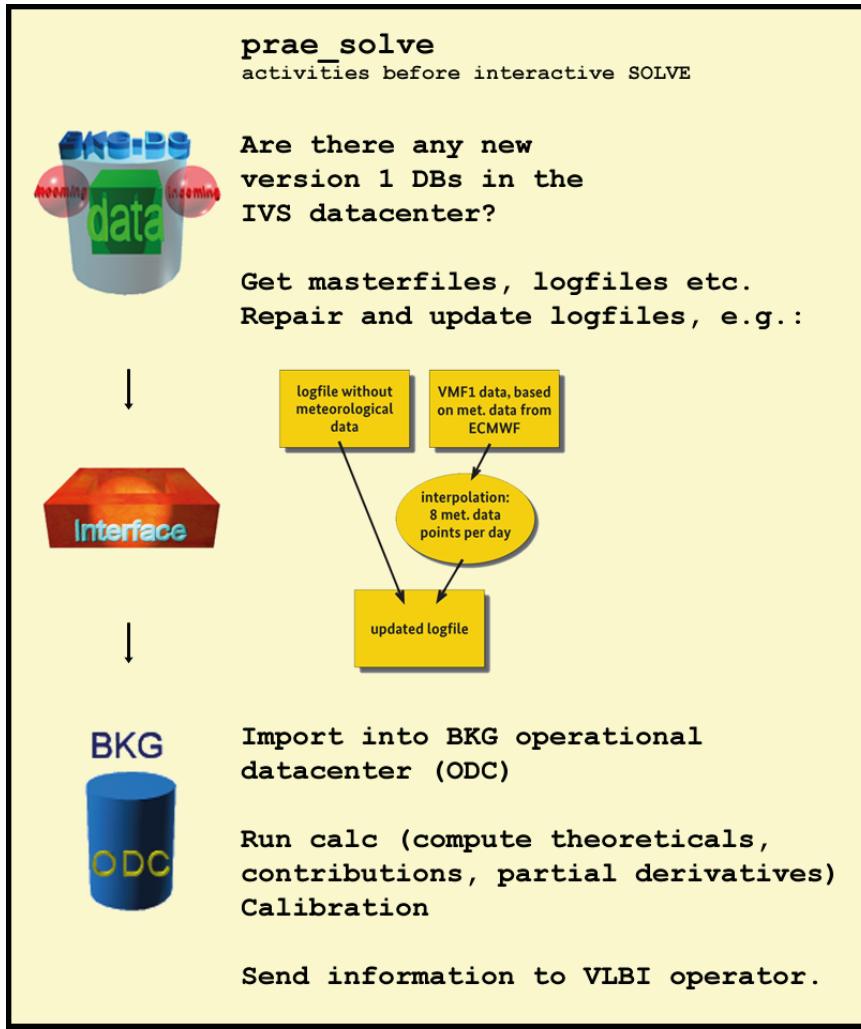

- BKG is full IVS Analysis Center
- Sessions analysed:
  - **24-hour sessions:**
    - 24 hours observation time
    - Global station network
    - At least twice per week (R1, R4)
  - **INTENSIVE sessions:**
    - 1 hour observation time
    - 2-3 stations only
    - Once per day
    - dUT1 estimation

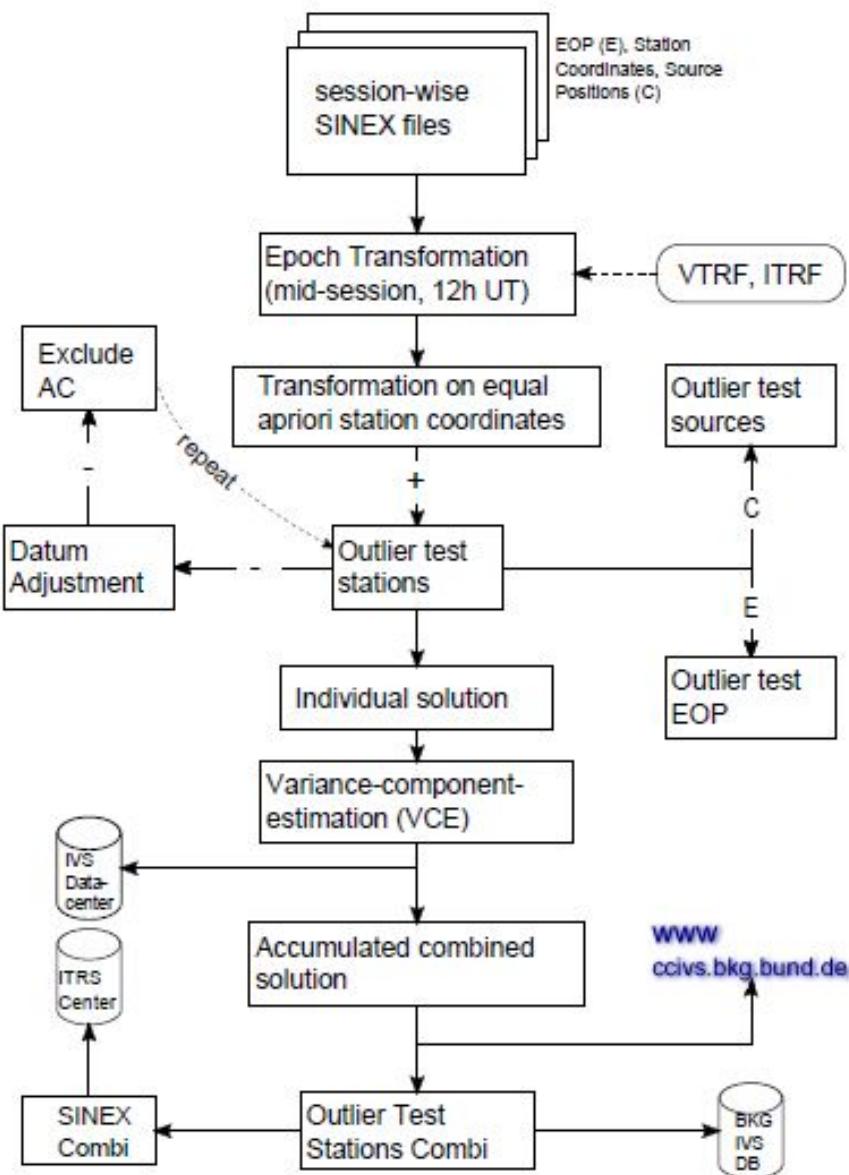

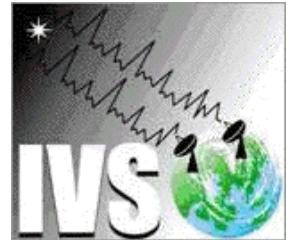

# VLBI data analysis at BKG

- Using ***CalcSolve / nuSolve*** software
- Covering **full data analysis path** (starting with correlator output)

# IVS Combination Center at BKG

## IVS Analysis Centers

**VIE** Vienna University of Technology, Austria

**USNO** United States Naval Observatory, USA

**SHAO** Shanghai Astronomical Observatory, China

**OPAR** Observatoire de Paris, France

**NMA** Norwegian Mapping Authority, Norway

**IAA** Institute of Applied Astronomy, Russia

**GSFC** Goddard Space Flight Center, USA

**GFZ** German Research Centre for Geosciences, Potsdam

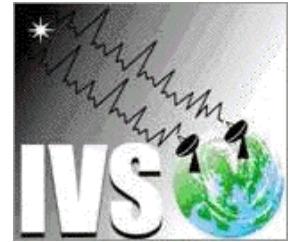

**CGS** Centro di Geodesia Spaziale, Italy

**BKG** Federal Agency for Cartography and Geodesy, Germany

**AUS** Geoscience Australia

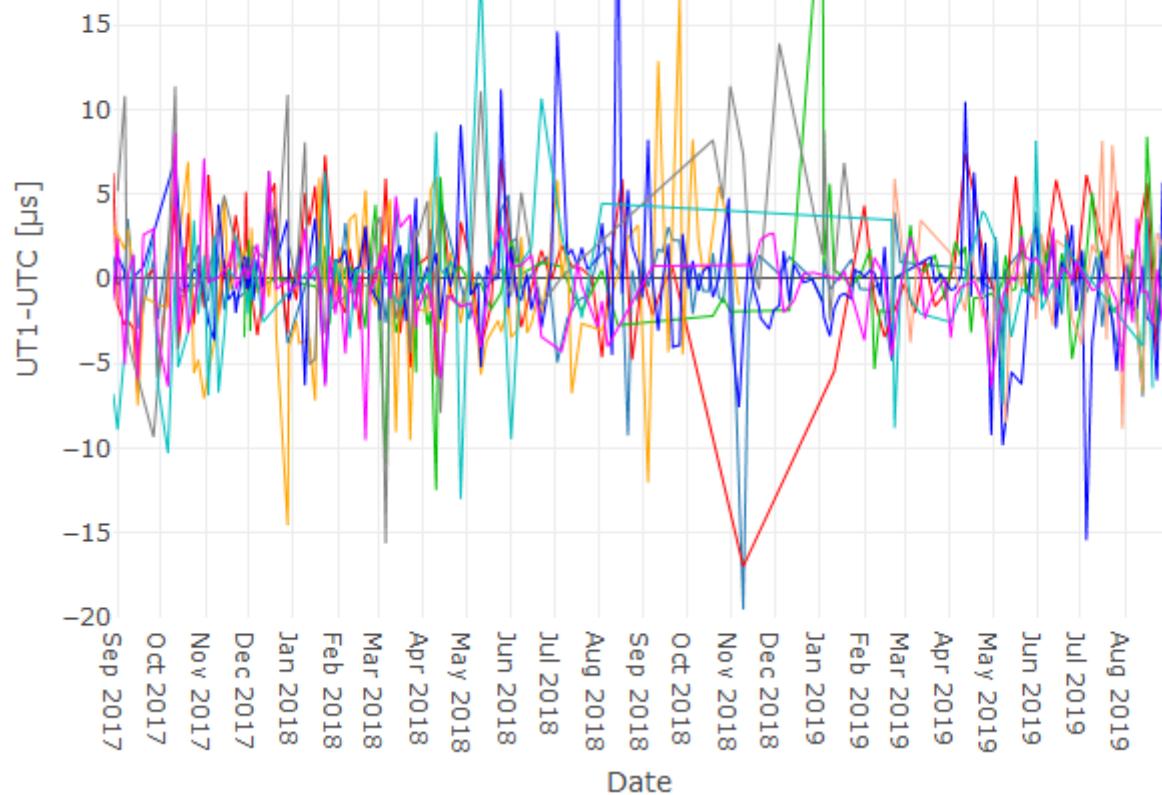

ic data analysis

# IVS Combination Center at BKG

Consistency of **Universal Time (dUT)** estimation:

	ASI	BKG	DGFI	GFZ	GSFC	IAA	NMA	OPA	USNO	VIE
Offset [μs]	+0.24	-0.28	-0.60	-2.22	+0.75	-3.18	-0.29	+0.60	+0.45	-0.56
$\sigma$ [μs]	0.28	0.64	0.54	1.61	0.34	1.28	0.48	0.65	0.26	2.56
RMS [μs]	3.29	4.57	3.92	6.96	3.39	5.21	3.66	3.68	1.92	16.55
WRMS [μs]	2.30	3.65	4.13	5.82	3.40	4.25	3.05	3.27	1.98	14.01
Num Obs.	69	34	60	14	100	12	42	26	61	31

# IVS Combination Center at BKG

Consistency of **global scale** estimation:

1 ppb ≈  
6 mm on Earth  
surface

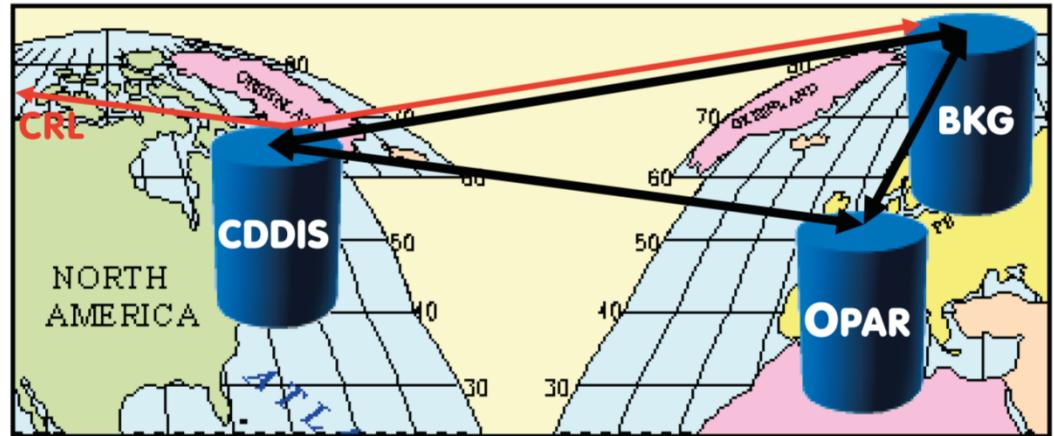

Millimeter level  
of agreement

# Global Data Center of the IVS

- The IVS operates 3 global Data Centers:
  - NASA/CDDIS, US
  - BKG, Germany
  - OPAR, France
- Regular mirroring procedure several times per day
- Provide public access to all IVS data and products for the community („open data“ policy)

# IERS = International Earth Rotation and Reference Systems Service

**IERS Central Bureau at BKG maintains the IERS website**

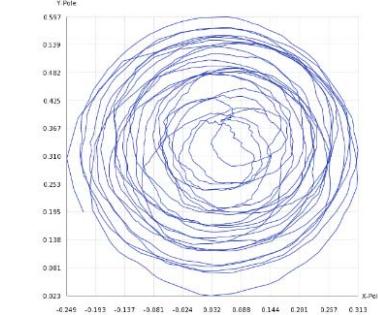

<https://www.iers.org>

Access point for all data, products, and publications of the IERS

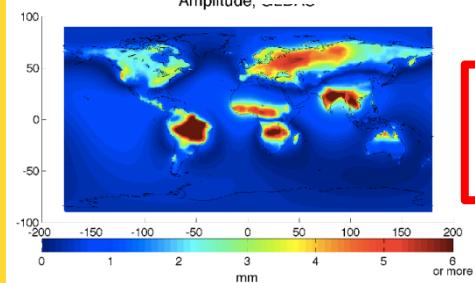

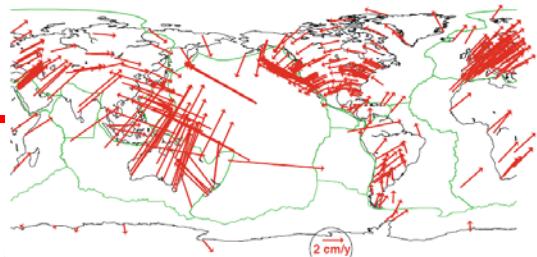

The screenshot shows the homepage of the International Earth Rotation and Reference Systems Service (IERS) website. The header features the IERS logo and the text "International Earth Rotation and Reference Systems Service". The top navigation bar includes links for "Organization", "Data / Products / Tools", "Publications", "Science background", "News / Meetings", and "Links". Below the navigation, there are several sections: "About IERS" (listing Directing Board, Analysis Coordinator, Product Centres, Technique Centres, Central Bureau, ITRS Combination Centres, Working groups, and Workshops); "Organization" (describing the IERS's mission and components, with a "More" link); "Data / Products / Tools" (listing data on Earth orientation, International Celestial Reference System/Frame, International Terrestrial Reference System/Frame, and geophysical fluids, with a "More" link); "Publications" (listing Messages to distribute news, Bulletins, Technical Notes, Annual Reports, and a "More" link); "Science background" (information about Earth rotation, reference frames, and observation techniques, with a "More" link); "Links" (links to Earth rotation and IERS - Geodesy and other geosciences - Astronomy - Space research - Mathematics - Physics - Books and papers - Computers and Informatics - Link lists and search engines, with a "More" link); and "News and meetings" (view news ordered by date or with respect to publications or general topics, with a "More" link). On the right side, there are "News" and "Meetings" sections with various links. The footer contains copyright information ("© 2013 - Federal Agency for Cartography and Geodesy. All rights Reserved") and logos for IAU and IUGG.

**Data / Products / Tools**

The IERS was established in 1987 by the International Astronomical Union and the International Union of Geodesy and Geophysics. According to the Terms of Reference, the IERS accomplishes its mission through the following components: Technique Centres, Product Centres, Combination Centres, Analysis Coordinator, Central Bureau, Directing Board.

**Publications**

IERS > Publications

### Publications

The IERS issues Messages to distribute news, Bulletins to provide Earth orientation data, Technical Notes to publish research results and proceedings of workshops, and Annual Reports to inform the public about its work.

#### IERS Messages

The IERS Messages contain short and rapid information about the IERS and its products for contributors and users. They replace the IERS Gazettes, issued between 1996 and 2000.

[product metadata](#)  
[available versions](#)

#### IERS Bulletins

IERS Bulletins contain rapid and monthly earth orientation data as well as leap second announcements and announcements of DUT1 distributed via e-mail or by downloading.

[more...](#)

#### IERS Technical Notes

The IERS Technical Notes give technical information related to the IERS activities, e.g. reference frames, excitation of the earth rotation, computational or analysis aspects, models, etc.

[more...](#)

#### IERS Annual Reports

The annual reports contain description of the activities of all components of the IERS within a specific year and give additional information on IERS structure, contacts and Terms of Reference.
